

October 22, 2005

at

Otto Maass, McGill University

9 - 9:45

Poster Setup

9:45 - 10:15 **Marie Bourgeaux, William Skene.** [U de M.](#)

Synthèse de nouveaux polyazométhine par auto assemblage d'unité thiophène.

10:15 - 10:45 **Qi Bo, Yue Zhao, Sherbrooke.**

Two-way pH change-induced release of metalloporphyrins from micelles of a double-hydrophilic block Copolymer.

10:45 - 11:00 **Coffee break**

11 - 11:30 **Florence Quist, Ashok Kakkar.** [McGill.](#)

Self-assembled monolayers, tools to facilitate the growth of a particular polymorph

11:30 - 12:00 **Marc-André Gagnon, Michel Lafleur.** [U de M.](#)

From curdlan powder to the triple helix gel structure, a FT-IR(ATR) study of the gelation process.

12 - 2:30 **Lunch and Poster**

2:30 - 3:00 **Faisal Aldaye, Hanadi Sleiman.** [McGill.](#)

DNA-Mediated Sequential Self-Assembly of Gold Nanoparticles into a Discrete Hexagon

3 - 3:30 **Matthieu Jalabert, Robert Prud'homme,** [U. de M.](#)

Synthesis and characterization of optically pure poly-l-lactide of controlled molecular weight.

3:30 - 5:00 **Continuation of poster session**
