

Molecule & nanoparticle characterization seminar

Montreal, QC, McGill U. room PP113 - June 18, 2014

8:30 am	Registration & Continental Breakfast
9:00 am	Benefits of using a triple detection system in GPC for molecular weight and conformation determination
10:15 am	Break
10:30 am	Nanoparticle tracking analysis: A new technique for molecule and nanoparticle size and concentration determination
11:15 am	Dynamic, electrophoretic and static light scattering: 3 techniques in one system for molecule and nanoparticle characterization
12:30 pm	Lunch
